SMMware Subscriber News

April 26, 2018,

SMMware has launched several revisions you might be interested in.

Improved Image/File Handling

- As you upload a batch of images, you can tag those images for the room they were taken in (Bedroom, Kitchen, etc).
- Images are grouped by these tags, and any new images added later with the same tag will appear with its group.
- If you use the wrong tag you can edit the image tags (as well as the file/image name).
- See the new YouTube covering Image/File Handling: https://youtu.be/CT5J00Kk2Kc

Scheduling

Our scheduling module has just gotten a lot more chatty! We have expanded the number of actions that result in emails being sent out. See the new YouTube covering Calendars and Scheduling: https://youtu.be/vEGHnUDbWDk

For "Directly Added" events:

We originally envisioned our 'direct add' approach to mean that offline communication had already taken place and just needed to be formalized. Over time the feedback provided by Senior Move Managers has indicated that more emails would in fact be desirable. So now...

- When you add an attendee 'directly' to a calendar item, they get a detailed email.
- If you later add more attendees or remove attendees, they too get emails.

For "Invitation" events:

- Invitees can now explicitly decline an invitation (before they only responded if they wanted to accept).
- When an invitee responds (whether yes or no), the main contact for the calendar item now gets an 'Accepted'/'Declined' email.

As always, thank you for your business, and if you have questions please don't hesitate to contact me.

Thanks.

- Brian Jacobs
