- SMMware User Meeting at the October Expo in Philadelphia
- HR Notes and Tasks

SMMware User Meeting

At the start of the expo, on Thursday, October 20th, 3:30PM-4:30PM, SMMware will be having a user meeting where you can provide feedback as a group about the latest revisions, and about what new features you'd like to see in SMMware next. Location will be the SMMware booth in the expo hall.

HR Notes and Tasks

On the various Associate Profile pages, you will now find a 'Notes' section and also a 'Tasks' section (Having 'HR' in their titles).

The Notes section is a place where you can track an employee's performance over time, and the Tasks section is a place where you can, for instance, set up reminders to yourself when it is time to give someone an annual review.

Only users with 'HR Role' permissions set to 'Read/Write' will be able to access these sections. For those without that permission, these sections simply do not appear.

These sections join the already existing File Manager, where you can upload performance review documents.

In Progress

Currently, our main focus is to integrate with Zapier, which is a 'go-between', similar to hiring a translator when visiting a foreign country. Zapier already knows how to talk to services like Docu-sign or Outlook Calendar. So we are teaching SMMware to talk to Zapier, which will allow you to tie SMMware to more 3rd party services than would be possible if every integration had to be built from scratch.

And lastly, we continue to work on feature requests from you, our subscribers.

Thanks.
